REVIEW 3

Scholarship & Financial Aid Management System

Application Implementation, Testing & Final Demonstration

Database Management System Project

Review 3 Objectives

From connected application to verified, reportable outcomes.

01

Database connection

02

Scheme setup

03

Application processing

04

Document verification

05

Eligibility checking

06

Approval & sanction

07

Payment tracking

08

Reporting

Application Architecture

A single transaction path coordinates eight focused modules.

Scheme Management	Student Application	Document Verification	Eligibility Checking
Approval	Sanction	Payment Tracking	Reports

Scheme Setup

The configurable foundation for every scholarship workflow.

Create scheme

Update details

Search schemes

SCHOLARSHIP SCHEME

Manage records

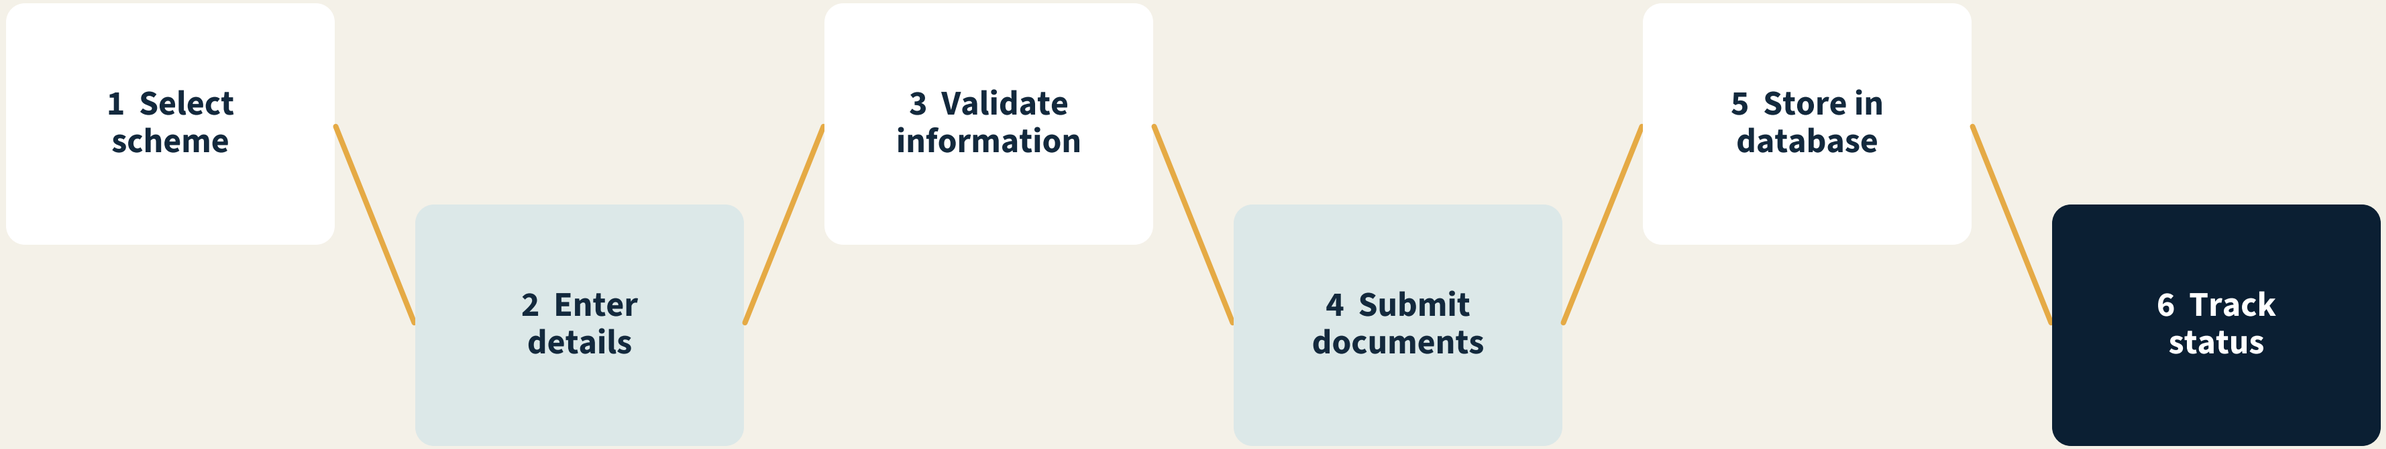

View details

Define eligibility

Set amount

Scholarship Application

A six-step journey with validation and traceable status.

Document Verification

Every submitted record moves through a clear, auditable decision.

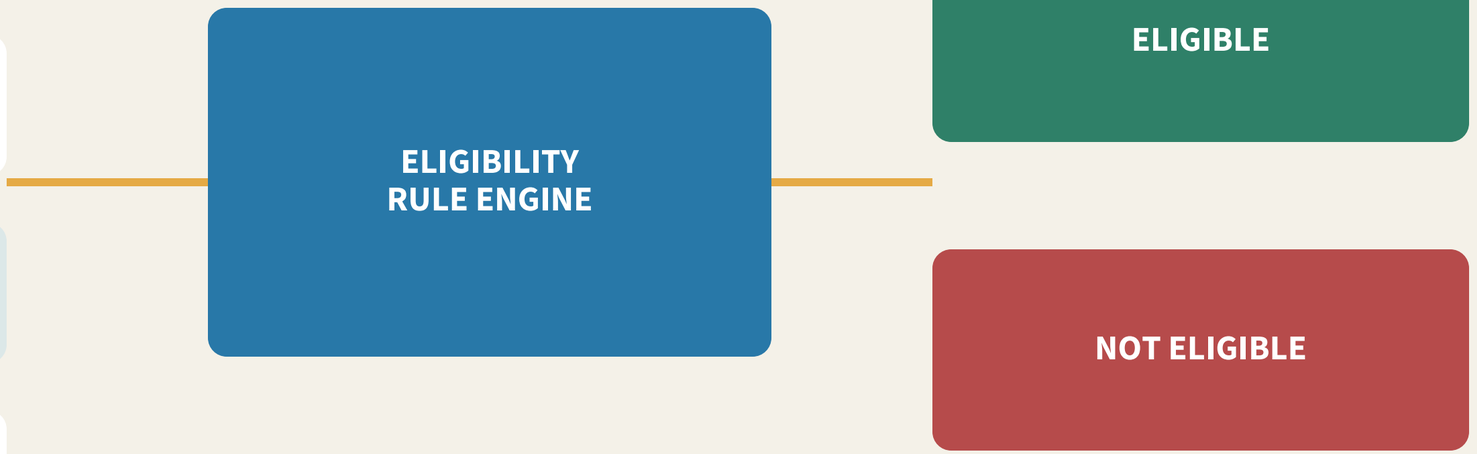

- ✓ View submitted documents
- ✓ Verify document details
- ✓ Update verification status
- ✓ Record verification results
- ✓ Flag incomplete / invalid files

Eligibility Checking

Rules are evaluated consistently before approval begins.

- ✓ Student details
- ✓ Income category
- ✓ CGPA
- ✓ Program
- ✓ Scheme requirements

Approval & Sanction

Two controlled stages convert a verified application into an authorized award.

APPROVAL

01 Review verified application

02 Approve or reject

03 Record stage and date

SANCTION

01 Generate approved sanction

02 Record sanctioned amount

03 Enforce scheme limit

Payment Tracking

Each disbursement remains linked, bounded and bank-valid.

Application ID

Sanction amount

Disbursement amount

Disbursement date

Payment mode

VALIDATION SAFEGUARDS

Disbursement ≤ sanctioned amount

Valid bank details required

PAYMENT RELEASE

Reporting

Operational data becomes decision-ready evidence.

01

Pending applications

02

Eligible students

03

Approvals

04

Sanctions

05

Disbursements

06

Renewals

07

Scheme statistics

CRUD, Search & Validation

Complete control, fast retrieval and defensive error handling.

CRUD
